

Compliance & Accreditations

At Blackbelt360, we make software you can trust.

How do we do this? By ensuring that all our software is fully accredited and compliant with all major international standards. We adhere fully to all relevant laws and regulations to safeguard our customers' data and interests. As a result, our software complies with the highest industry standards as set by the following:

R2v3 is SERI's (Sustainable Electronics Recycling International) global certification standard for the Information Technology Asset Disposition (ITAD) industry.

The GSMA (Global System for Mobile Communications Association) is an industry organisation representing the interests of mobile network operators worldwide.

ADISA (Asset Disposal and Information Security Alliance) who provide accreditation for various companies offering IT Asset Disposal and data erasure services.

Achieving ISO 27001 ISM means that devices processed using Blackbelt360 software adhere to the highest standards of data security, risk management, and compliance.

The FCS (Federation of Communication Services) is the largest trade association for the professional communications services industry in the UK.

ISO 9001 are a set of Quality Management Systems standards that recognize organizations whose products or services keep within statutory and regulatory requirements.

The National Institute of Standards & Technology (NIST) is a U.S Department of Commerce agency promoting US innovation and industrial competitiveness.

GDPR (General Data Protection Regulation) ensures that businesses and organisations safeguard the processing and movement of all EU and UK citizens' personal data.

NIS (Networks and Information Systems) is European Union cyber security legislation setting standards of NIS security across the EU's critical infrastructure.
